

Statement of Candidacy

My name is Colson Thornton, and I am running to be the 1L class president. I went to Louisiana Tech where I majored in Mathematics and Computer Science, and afterward, I taught for a year. While teaching was not suitable for me, the job prepared me to deal with a variety of people. Also, listening became a skill I learned to develop, from the most trivial of issues (and there were a lot) to serious decisions. I feel that I can handle the responsibility due to both my background in math (dealing with data and financials) and prior experience in managing people.

While I hope to be chosen as the 1L president, I am grateful for my candidacy just to be considered.
